NOTES:

- A** - Watershed and subwatersheds under Category 4c are waterbodies that lack adequate flow, which impaired some of the designated uses.
- B** - Watershed that have and approved TMDL. for Río Cibuco the TMDL was approved on September 2002, the pollutant was fecal coliform
- C** - Watershed that have and approved TMDL for Río de la Plata the TMDL was approved on September 2003, the pollutant was fecal coliform
- D** - Watershed that have and approved TMDL. Río Grande de Loiza the TMDL was approved on September 2007, the pollutant was fecal coliform
- E** - This segment was inadvertently omitted from the 305b/303d 2006 cycle integrated report
- F** - 7.4 miles of this waterbody, rio arroyo cajul, was not evaluated because this watershed was always dry in this cycle
- G** - Watershed and subwatershed that were monitored by a synoptic study and were included in the 2006 303(d) list.
- Special Study - Field Sampling Report & Data Presentation, Puerto Rico Wastewater Treatment Plants and Receiving Streams (EPA and PRASA)
- R1** - Primary Contact Recreation
- R2** - Secondary Contact Recreation
- AL** - Aquatic Life
- DW** - Raw Source for Drinking Water
